

ASTRAL GLITCH – ART BY DANA BURLINGAME

My name is Dana Burlingame and I am a ceramicist and painter based in California. I have done projects like stage art, album covers, custom figurines, live painting at events, festivals and fundraisers, murals etc. I am inspired by nature as well as everything else in this world and beyond. since as long as I can remember I have been painting and making creations out of clay. I like to allow my viewers to interpret my art inviting them to infuse their own ideas and meaning into pieces. Some paintings and sculptures hold profound personal significance but most are from my imagination and started without a set plan. I also do commissions and have been blessed with live painting at festivals and doing murals around the community.

Art serves as a reminder of the beauty and wonder that surrounds us every day and I will continually strive to create and expand as much as possible. Every day is a chance to learn something new, and I can't wait to expand my knowledge and share it with others.

A more recent opportunity I've been enjoying is doing commercial murals such as a recent mural at a luxury car detailing shop featuring logo work and a black outline shadow drop. It's an honor to do work like this as it helps me master my craft and gives me an opportunity to learn.
