(C) Training. In addition to any other standard of care requirements set forth in this Agreement, Contractor warrants that all employees and subcontractors shall have sufficient skill and experience to perform the Services assigned to them without impacting water quality in violation of the laws, regulations and policies described in this Section. To the extent available, the bonds shall further provide that no change or alteration of the Agreement (including, without limitation, an increase in the total compensation, as referred to above), extensions of time, or modifications of the time, terms, or conditions of payment to the Contractor, will release the surety. If the Contractor fails to furnish any required bond, the City may terminate this Agreement for cause.

3.2.17 Warranty. Contractor warrants all Services under the Contract (which for purposes of this Section shall be deemed to include unauthorized work which has not been removed and any non-conforming materials incorporated into the work) to be of good quality and free from any defective or faulty material and workmanship. Contractor agrees that for a period of one year (or the period of time specified elsewhere in the Contract or in any guarantee or warranty provided by any manufacturer or supplier of equipment or materials incorporated into the work, whichever is later) after the date of final acceptance, Contractor shall within ten (10) days after being notified in writing by the City of any defect in the Services or non-conformance of the Services to the Contract, commence and prosecute with due diligence all Services necessary to fulfill the terms of the warranty at its sole cost and expense. Contractor shall act sooner as requested by the City in response to an emergency. In addition, Contractor shall, at its sole cost and expense, repair and replace any portions of the work (or work of other contractors) damaged by its defective Services or which becomes damaged in the course of repairing or replacing defective work. All costs associated with such

corrective actions and testing, including the removal, replacement, and reinstitution of equipment and materials necessary to gain access, shall be the sole responsibility of the Contractor. All warranties and guarantees of subcontractors, suppliers and manufacturers with respect to any portion of the work, whether express or implied, are deemed to be obtained by Contractor for the benefit of the City, regardless of whether or not such warranties and guarantees have been transferred or assigned to the City by separate agreement and Contractor agrees to enforce such warranties and guarantees, if necessary, on behalf of the City. In the event that Contractor fails to perform its obligations under this Section, or under any other warranty or guaranty under this Contract, to the reasonable satisfaction of the City, the City shall have the right to correct and replace any defective or non-conforming work and any work damaged by such work or the replacement or correction thereof at Contractor's sole expense. City shall, within 45 days of receiving such statement, review the statement and pay all approved charges thereon.

3.3.3 Deductions. City may deduct or withhold, as applicable, from each progress payment an amount necessary to protect City from loss because of: (1) stop payment notices as allowed by state law; (2) unsatisfactory prosecution of the Services by Contractor; (3) sums representing expenses, losses, or damages as determined by the City, incurred by the City for which Contractor is liable under the Agreement; and (4) any other sums which the City is entitled to recover from Contractor under the terms of the Agreement or pursuant to state law, including Section 1727 of the California Labor Code. The failure by the City to deduct any of these sums from a progress payment shall not constitute a waiver of the City's right to such sums.

3.3.4 Reimbursement for Expenses. Contractor shall not be reimbursed for any expenses unless authorized in writing by City.

3.3.5 Extra Work. At any time during the term of this Agreement, City may request that Contractor perform Extra Work. As used herein, "Extra Work" means any work which is determined by City to be necessary for the proper completion of the Project, but which the parties did not reasonably anticipate would be necessary at the execution of this Agreement. Contractor shall not perform, nor be compensated for, Extra Work without written authorization from City's Representative.

3.3.6 Prevailing Wages. Contractor is aware of the requirements of California Labor Code Section 1720, *et seq.*, and 1770, *et seq.*, as well as California Code of Regulations, Title 8, Section 16000, *et seq.*, ("Prevailing Wage Laws"), which require the payment of prevailing

wage rates and the performance of other requirements on "public works" and "maintenance" projects. Since the Services are being performed as part of an applicable "public works" or "maintenance" project, as defined by the Prevailing Wage Laws, and since the total compensation is \$1,000 or more, Contractor agrees to fully comply with such Prevailing Wage Laws. City shall provide Contractor with a copy of the prevailing rates of per diem wages in effect at the commencement of this Agreement. Contractor shall make copies of the prevailing rates of per diem wages for each craft, classification or type of worker needed to execute the Services available to interested parties upon request, and shall post copies at the Contractor's principal place of business and at the project site. Contractor shall defend, indemnify and hold the City, its elected officials, officers, employees and agents free and harmless from any claim or liability arising out of any failure or alleged failure to comply with the Prevailing Wage Laws. It shall be mandatory upon the Contractor and all subcontractors to comply with all California Labor Code provisions, which include but are not limited to prevailing wages (Labor Code Sections 1771, 1774 and 1775), employment of apprentices (Labor Code Section 1777.5), certified payroll records (Labor Code Sections 1771.4 and 1776), hours of labor (Labor Code Sections 1813 and 1815) and debarment of contractors and subcontractors (Labor Code Section 1777.1). The requirement to submit certified payroll records directly to the Labor Commissioner under Labor Code section 1771.4 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Section 1771.4.

3.3.7 Registration/DIR Compliance. If the Services are being performed as part of an applicable "public works" or "maintenance" project, and if the total compensation is \$15,000 or more, then pursuant to Labor Code Sections 1725.5 and 1771.1, the Contractor and all subcontractors performing such Services must be registered with the Department of Industrial Relations. Contractor shall maintain registration for the duration of the Project and require the same of any subcontractors, as applicable. This Project may also be subject to compliance monitoring and enforcement by the Department of Industrial Relations. It shall be Contractor's sole responsibility to comply with all applicable registration and labor compliance requirements. Notwithstanding the foregoing, the contractor registration requirements mandated by Labor Code Sections 1725.5 and 1771.1 shall not apply to work performed on a public works project that is exempt pursuant to the small project exemption specified in Labor Code Sections 1725.5 and 1771.1. Any stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor that affect Contractor's performance of Services, including any delay, shall be Contractor's sole responsibility. Any delay arising out of or resulting from such stop orders shall be considered Contractor caused delay and shall not be compensable by the City. Contractor shall defend, indemnify and hold the City, its officials, officers, employees and agents free and harmless from any claim or liability arising out of stop orders issued by the Department of Industrial Relations against Contractor or any subcontractor.

3.4 Termination of Agreement.

3.4.1 Grounds for Termination. City may, by written notice to Contractor, terminate the whole or any part of this Agreement at any time and without cause by giving written notice to Contractor of such termination, and specifying the effective date thereof, at least seven (7) days before the effective date of such termination. Upon termination, Contractor shall be compensated only for those services which have been adequately rendered to City, and Contractor shall be entitled to no further compensation. Contractor may not terminate this Agreement except for cause.

3.4.2 Effect of Termination. If this Agreement is terminated as provided herein, City may require Contractor to provide all finished or unfinished Documents and Data and other

information of any kind prepared by Contractor in connection with the performance of Services under this Agreement. Contractor shall be required to provide such document and other information within fifteen (15) days of the request.

3.4.3 Additional Services. In the event this Agreement is terminated in whole or in part as provided herein, City may procure, upon such terms and in such manner as it may determine appropriate, services similar to those terminated.

If no such Government Code claim is submitted, or if any prerequisite contractual requirements are not otherwise satisfied as specified herein, Contractor shall be barred from bringing and maintaining a valid lawsuit against the City.

- Contractor shall maintain the job site in a clean and safe condition during and after the performance of Service. Any damage to City property caused by Contractor shall be promptly repaired at the Contractor's expense. All associated equipment shall be removed from the job site by the completion of the Project, and the job site shall be returned to its original condition.

Video Log:

- Complete three (3) color video log surveys. Survey must be accompanied by a written report detailing all findings for the entire survey.
- One video log shall be conducted before rehabilitation work begins, one after brush/bail services, and one after rehabilitation services are completed or as specified by City.

Pipe Retrieval

Retrieve small diameter pipe as specified by City.

Casing Inspection Thickness Measurement

- By means of a Casing Inspection Thickness Measurement (CITM) tool and the Electromagnetic Thickness (EMT24) tool, assess the thickness and integrity of the full length of the casing walls.
- By means of Remote Eddy-Current (REC) method, determine the integrity of wellbore casings.

Potable water well-jetting services

Water jetting of the casing is to be completed if conditions require such services, and the Contractor's assessment that the casing can withstand such treatment.

Brush and Bail:

- Mechanically remove biofilm nodules/corrosion in the interior of the well casing. Brush and bail (using a spudder rig) by means of a spiral wire brush assembly.
- Based on the Contractor's own assessment of the casing condition, Contractor shall make its own determination as to the size and type of brush to be used (steel or poly) to achieve the most effective cleaning.
- Contractor shall brush the well casing for a period of approximately ten (10) minutes per 20-foot interval from the historical water surface elevation to total well depth. Bristles must remain aggressive on the casing, as permitted by casing condition.
- Brushing shall be performed for three (3) days for eight (8) hours per days. Specific targeted areas shall be identified in collaboration with City. After brushing is completed, all debris shall be bailed from the bottom of the well.

Dual-swab:

- Dual-swab pumping for all well casing perforated intervals. Initially, the dual-swab tool will be inserted into the well and set at the top 10FT of the screened zone.
- Airlift pumping will occur at the maximum rate of 250-gpm for a period of approximately 40 minutes.
- The dual-swab pumping equipment will be raised and lowered throughout the entire screened zone. During this process, Contractor shall rehabilitate the well using chemical treatment. Contractor shall inject swab/mix chemicals (275 gallons of Well Klean), 5 gallons of Hydrogen Peroxide-35%, 200 gallons of 20 Baume HCL, and 5 gallons of Sodium Hypochlorite-12.5%).

Bioremediation/Plunging:

- Contractor shall perform two (2) biologic remediation cycles.
- At each cycle, utilize WaterSOLV™BC, and Well-Klean Concentrate via tremie with specified plunger (10FT in length) at all perforation zones, allow to soak for 72-hours, and airlift after each remediation.
- Contractor shall be trained in the use of WaterSOLV™BC, and HCT, LLC and the Well-Klean® Systems.

Descaling:

- Contractor shall perform descaling cycle.
- Utilize Well-Klean® Preblend via tremie with specified plunging tool at all perforated zones of the casing. Allow to soak for 72 hours.

Neutralize, Passivate, Plunge, & Develop:

- Prepare solution with sodium bicarbonate and water. Tremie solution into the well.
- Zonal plunge entire casing. Upon completion, plunge and lift perforated casing in 5 ft. segment, 10 ft. maximum overall, 5 ft. minimum between plungers, until the water runs clear.
- Clarity of each zone is to be determined by a grab sample into a clean container, where sediment does not occur after the water sample settles for 5 minutes.

Disinfection:

- Contractor shall perform two (2) cycles of disinfection with chlorine.
- Pre-mix disinfection solution with potable water and disinfect.
- Tremie the disinfectant into the well in no more than 5 ft. segment, 10 ft. total tool maximum. Aggressively plunge each segment.

Test Pump:

- Contractor shall install a test pump. Contractor shall determine the pump design, parameters, and depth in consultation with the City. In addition, the City requests no oil lubed line shafts be used; and if water lube is not available or effective, Contractor shall absorb all oil from water in the well and re-video to ensure all absorbents have been retrieved.
- Contractor shall provide all equipment, electrical panel, conduit, steel discharge line, control valves, meters (calibrated, dial indicator not greater than 2,000 gpm and totalizer), Rossum sand tester, water level sounder, and ancillary equipment necessary to perform the work.
- The motor/vfd shall be compatible with the incoming Edison amperage rating within the City's MCC so as not to cause damage to the City's conductors or MCC. If Contractor cannot provide such equipment, Contractor shall provide their own genset to supply power to their MCC.

Data Collection:

- Contractor shall collect operation and production data, and well sand production.
- Test Pump operation shall consist of development by pumping and surging, step-drawdown, and constant rate testing.
- Results of the test pump shall be graphed and summarized and include recommendations for design and sustainable operation of the permanent pumping equipment.
