*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

This two-story Craftsman home features a front-facing primary gable and large wall dormers on the sides. Each gable/dormer features a large vent with horizontal louvers. The east elevation features a window popout covered by a shed roof, and the west elevation features a brick fireplace. Siding includes narrow clapboard on the first story and shingles on the second story. Unusual features on the front elevation indicate possible modifications, and include a front door with fluted pilasters and a broken pediment, as well as a small wrought-iron balcony above the front door. It is unknown whether a front porch ever existed. Additional features include twelve-over-one double-hung windows, multi-pane casement windows and highly decorative faux roof support beams. An apparent addition on the rear of the house features a shed roof and wood siding.
