Update

P3a. Description (continued):

to the front façade over the door, and a metal downspout runs down the façade to the west of the door. A satellite dish and a large antenna have been mounted to the roof. A metal air conditioning turbine has been mounted to the top of the gable.

The land in front of the structure has been covered with concrete and is currently utilized as parking space. There is a concrete driveway that runs along the east side of the structure. It leads to an attached single-car garage. There are no other notable landscaping elements.

Alterations to this building may include the re-stuccoing of the exterior surfaces. It appears to be in fair to good condition. The integrity is fair to good.

This Minimal Traditional single-family residence's character defining features include:

- rough cementitious stucco exterior wall cladding,
- ·a low-pitched gable roof with composite shingles,
- attached single-car garage
